Why Now?	<p>This builds on learners' study of music magazines in Year 10. They now have enough knowledge of all four key concepts and how they are applied to magazines to begin to apply this to their own production work. Learners will start by conducting research into existing texts and as this reflects industry practice. They will then plan their front cover, as this will support them to consider the whole concept of the magazine, rather than just one element of it.</p> <p>In addition, they will also study newspapers as both magazines and newspapers are classified as print (formats).</p>	Now that learners have completed the necessary research and planning, they will be well positioned to begin to create their own magazine front covers.	<p>Learners are now in a position to explore the most challenging media industries: newspapers and online news</p> <p>As learners have now given consideration to the whole concept of their magazine by producing their front cover, it is appropriate for them to choose one element to develop in more detail by researching and producing a feature article for their magazine.</p>	Learners will be engaging in synoptic work in preparation for their OCR Media Studies Papers one and two	Learners will partake in final Pre-Public Examination (PPE) practice and feedback	N/A
